

Karim Ashraf

Product Designer | Product Strategy, Growth and AI-Assisted Delivery

Cairo, Egypt | (+20) 10 6915 3644 | karim.sn98@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFILE

Product Designer with 4+ years of experience shaping and shipping consumer and B2B products across regulated services, SaaS, social commerce and AI-enabled ventures. Combines customer research, behavioral data, product strategy and technical understanding to turn complex problems into clear, usable experiences. Works across discovery, prioritization, prototyping, delivery and iteration, with a track record of improving conversion, supporting operational scale and aligning cross-functional teams.

SKILLS

Product design: Interaction design, journey design, responsive web and mobile, information architecture, prototyping, design systems, accessibility, implementation QA

Discovery and growth: Customer interviews, usability testing, funnel analysis, onboarding, activation, personalization, behavioral design, experimentation

Product strategy and delivery: Problem framing, MVP definition, prioritization, requirements, business-rule mapping, workshop facilitation, cross-functional delivery

AI-assisted product building: Research synthesis, rapid prototyping, specifications, edge-case exploration, backlog decomposition, agentic workflows, human validation

Tools: Figma, FigJam, Miro, Maze, Mixpanel, Firebase (experimentation), Notion, Google Workspace, ChatGPT, Claude

PROFESSIONAL EXPERIENCE

Money Fellows

Product Designer - Full-time Feb 2025 - Present | Cairo, Egypt - Hybrid

- Led research synthesis, journey design, prototyping and implementation review for the Goals experience, reaching 12% organic engagement, 61.1% conversion to goal creation and 69.8% conversion into the circle-join flow.
- Designed recommendation entry points and bundle-selection journeys across Recommendation Engine phases 0-1, supporting 14% adoption, 6,000+ recommendation-driven bundles and approximately 48% conversion at high-performing new-user entry points.
- Synthesized insights from 70+ customer interviews and behavioral analysis into a clearer onboarding sequence and interaction guidance, reaching approximately 99% screen-to-screen conversion.
- Mapped current and future states, designed customer messaging and exception flows, and supported implementation for a high-priority migration delivered in under two weeks.
- Created journey maps, interaction flows, UI states and specifications for eligibility, limits, verification, recommendations and lifecycle changes, translating complex rules into clear customer decisions.

1MORETHING Ventures

Product Designer - Part-time Mar 2024 - Feb 2025 | Remote

- Used journey mapping, interaction design and rapid prototyping to turn ambiguous venture concepts into focused MVP scopes and decision-ready product direction.
- Shaped Layla HR, Inveasy, Daaj and JumlatyPro across AI HR automation, computer-vision stock counting, grocery assistance and B2B ordering.
- Mapped AI uncertainty, fallback behavior and human-review paths so technical limitations were visible in the customer experience.
- Connected user needs, business models and technical feasibility through user flows, interface specifications, stakeholder reviews and delivery handoff.

Bluworks

Product Designer - Full-time Dec 2023 - Jun 2024 | Cairo, Egypt - Hybrid

- Designed a distinct fixed-tablet clock-in experience in response to client safety and operational concerns, helping reopen sales opportunities while preserving relevant app functionality.
- Designed configurable approval workflows and a dedicated managerial mode for different customer structures and workforce policies.
- Expanded payroll, attendance and bulk-upload capabilities, reducing repetitive customer-success work and improving platform scalability.
- Separated high-frequency frontline interactions from complex administrative workflows while keeping both contexts coherent within one product system.
- Worked with Product and Engineering from problem framing through implementation review, resolving states, permissions and operational edge cases.

Sharwa

Product Designer - Full-time Aug 2022 - Sep 2023 | Cairo, Egypt

- Redesigned onboarding and purchase guidance using gamified progression, increasing app-open-to-order-placement conversion from 7% to 14%.
- Designed the Open Groups homepage experience, increasing group-joining conversion from 40% to 75% within two months.
- Planned and designed responsive mobile and web journeys that made group buying easier to understand, compare and complete.
- Facilitated alignment workshops across Product, Operations and Marketing, connecting customer behavior with delivery and commercial constraints.

SELECTED PRODUCT INITIATIVE

Playful

Founder, Product Designer and Product Owner 2026 | Self-initiated

- Directed AI collaborators to shape and build a live multi-product discovery platform with five public product doors and a shared district experience.
- Defined product boundaries, journeys, acceptance criteria and a domain-structured architecture spanning eight database schemas and a separate founder console.
- Used AI-assisted implementation to test product judgment in production while retaining human review, privacy boundaries and explicit beta limitations.

EDUCATION AND CREDENTIALS

Mansoura University | B.Sc. Communication and Information Engineering | Sep 2016 - Aug 2021 | A+ graduation project

DvCircles | Business Scholarship | Mar 2020 - Jun 2020

Selected UXcel credentials: UX Designer; Design and Product Leadership; Enhancing UX Workflow with AI; Service Design Fundamentals; Design Thinking for Product Teams; Workshop Facilitation

LEADERSHIP AND LANGUAGES

AIESEC, 2018-2021: UI/UX Designer; Local Committee Vice President of B2C and Customer Experience; Organizing Committee President for Global Village. **Languages:** Arabic (native), English (professional).
